

Sir/Madam

As a Co Director of Sustainable Carlisle, I would be keen to hear the Trusts statement regarding the Climate Emergency and Zero Carbon Farming. We are pleased the Trust will be taking responsibility, for continuing Agricultural education in Cumbria, after the disappointing breaking up of the Newton Rigg campus.

All our futures depend on the responsible relationship with the land, biodiversity and the protection of the living world.

Myself and my co Directors would be keen to understand your plan to develop a Zero Carbon agriculture program .

Kind Regards

Paul R Cross

Co Director
Sustainable Carlisle
